

GENERAL TERMS AND CONDITIONS

(Continued from Sheet No. 188.1)

METERING (CONTINUED)

**ADVANCE COPY
FOR INFORMATION ONLY**

STANDARD METERING (CONTINUED).

Other Metering (Continued)

For a nonresidential retail customer for which electric power and energy is delivered at a maximum half-hourly rate that is at least 100 kW, meter-related facilities provided by the Company in a standard metering installation include meter-related facilities adequate to measure the kWhs delivered to the retail customer and the rate at which such electricity is delivered for each half-hour in the monthly billing period.

For a retail customer using electric service for dusk to dawn operation of fixture-included lighting units, no metering installation is provided by the Company. For a lighting retail customer using electric service for the operation of public street lighting or other lighting systems, other than for fixture-included lighting units, the Company may provide meter-related facilities adequate to measure the kWhs delivered to such lighting retail customer.

If other or additional meter-related facilities are provided by the Company for the Company's convenience, such facilities are deemed to be part of a standard metering installation.

- * The Company must undertake all reasonable efforts to ensure that AMI metering is installed at each point of metered electricity delivery at each retail customer's premises by June 30, 2022. The Company must provide AMI metering at each point of metered electricity delivery at each retail customer's premises within the time allowed for AMI deployment pursuant to Section 16-108.5 of the Public Utilities Act.

NONSTANDARD METERING.

If more or different meter-related facilities than those needed to provide a standard metering installation for the retail customer are in place, required, or requested by such retail customer, and such facilities are reasonably and technically feasible, and can be furnished, installed, operated, replaced, and maintained with no significant adverse impact on the Company's system with respect to reliability or efficiency, such facilities are furnished, installed, owned, operated, replaced, and maintained by the Company, provided the Company is allowed to recover from the retail customer the costs of furnishing, installing, owning, operating, replacing, and maintaining such facilities. Such more or different facilities are considered to be nonstandard services and facilities, and the Company provides such facilities in accordance with the provisions for providing nonstandard services and facilities.

- * **NON AMI METERING.**

For a situation in which the AMI Metering subsection of the Standard Metering section of this Metering part is applicable to a retail customer and meter-related facilities that are different from those included in an AMI metering installation are in place at such retail customer's premises, such facilities are designated as non AMI metering. Non AMI metering facilities are furnished, installed, owned, operated, replaced, and maintained by the Company, provided the Company is allowed to recover from the retail customer costs of furnishing, installing, owning, operating, replacing, and maintaining such facilities in accordance with the provisions for providing non AMI metering. A retail customer at a premises to which the Company was denied access or was, after reasonable attempts, unsuccessful in obtaining access to provide an AMI metering installation is deemed to have refused AMI metering.

METERING (CONTINUED)

REQUIRED METERING.

The installation of meter-related facilities adequate to measure the kWhs delivered to the residential retail customer and rate at which such electricity is delivered for each half-hour in the monthly billing period is a prerequisite for a residential retail customer taking service under a real time pricing program that is in accordance with the ICC Order entered December 20, 2006, in Docket No. 06-0617.

A separate metering installation adequate to measure the kWhs delivered to a lighting retail customer is required for each separate delivery point for such lighting retail customer connected to lighting units that operates during some but not all hours that occur between dusk and dawn.

A separate metering installation is required for each separate delivery point at a retail customer's premises. For a situation in which a retail customer has multiple points of delivery and a demand register at any such point of delivery, all such points of delivery must have demand registers. For a situation in which a retail customer has multiple points of delivery and an interval demand recording register at any such point of delivery, all such points of delivery must have interval demand recording registers.

Notwithstanding the previous provisions of this Required Metering section, for a situation in which the AMI Metering subsection of the Standard Metering section of this Metering part is applicable to a retail customer and such retail customer's premises has multiple points of delivery with metering facilities provided by the Company, all such points of delivery must have AMI metering installations, unless such meter-related facilities are provided in accordance with the provisions for providing non AMI metering.

BILLING AND PAYMENT (CONTINUED)

INSTALLATION OF FACILITIES (CONTINUED).

For a situation in which the AMI Metering subsection of the Standard Metering section of the Metering part of these General Terms and Conditions is applicable to a retail customer and non AMI metering had been installed, replaced, or exchanged at such premises since the date that such AMI Metering subsection became applicable to such retail customer, the subsequent installation of AMI metering is performed in accordance with the provisions of these General Terms and Conditions, other tariffs on file with the ICC, and the Company's current applicable unit costs for installing nonstandard services and facilities.

- * For a situation in which (a) service under Rider NAM - Non AMI Metering (Rider NAM) is terminated for a retail customer as a result of the installation of AMI metering by the Company at such retail customer's premises and (b) such retail customer had been subjected to the meter reading charges listed in the Monthly Charges section of such rider prior to such termination, the Company provides a credit to such retail customer in an amount equal to the total meter reading charge that had been listed on such retail customer's last monthly bill for electric service issued prior to such termination.

CONTINUING ELECTRIC SERVICE.

Except as provided in (a) the Electronic Billing subsection of this Continuing Electric Service section and (b) Rider SBO - Single Bill Option (Rider SBO), the Company issues monthly bills containing charges for the provision of electric service on paper via United States mail.

Monthly Billing Periods

For purposes of counting the number of days in a retail customer's monthly billing period, the monthly billing period (a) ends on the Company's regularly scheduled meter reading or data acquisition date to compile meter usage data for regularly scheduled electric service billing purposes for such retail customer which occurs during the designated month of the Company's monthly billing cycle schedule and (b) begins on the day after the Company's regularly scheduled meter reading or data acquisition date to compile meter usage data for regularly scheduled electric service billing purposes for such retail customer during the Company's prior monthly billing cycle. The scheduled monthly billing cycle date is counted as the end day in the monthly billing period and not the start day. By way of example, a retail customer's August monthly billing period begins the day after the Company's regularly scheduled monthly billing cycle date for the retail customer occurring in the Company's July monthly billing cycle and ends on the Company's regularly scheduled monthly billing cycle date for such retail customer occurring in the Company's August monthly billing cycle.

Due to holidays and weekends, the Company's twelve (12) monthly billing cycles do not necessarily coincide with their corresponding calendar months. For example, the first monthly billing cycle date for the April monthly billing cycle may occur on March 31. As a result, for a retail customer for which the regularly scheduled monthly billing cycle date is the first date of the monthly billing cycle, such retail customer's April monthly billing period reflects usage that was provided on or before March 31 because that is the retail customer's regularly scheduled monthly billing cycle date for the April monthly billing cycle.

Applicable to Rate BES, Rate BESH, and Rate RDS

*** APPLICABILITY.**

Prior to July 1, 2022, this rider is applicable to any retail customer to which the AMI Metering subsection of the Standard Metering section of the Metering part of the General Terms and Conditions of the Company's Schedule of Rates is applicable and that is receiving electric service from the Company which is measured by non advanced (AMI) metering as described in the Non AMI Metering section of such Metering part.

DEFINITIONS.

Definitions of terms used in this rider are provided in the Definitions part of the General Terms and Conditions of the Company's Schedule of Rates.

TERM OF SERVICE.

- * A retail customer's term of service hereunder is the period during which the retail customer is receiving electric service from the Company that is measured by non AMI metering. A retail customer's service hereunder terminates after such non AMI metering is removed and an AMI metering installation, as defined in the Definitions part of the General Terms and Conditions of the Company's Schedule of Rates, is provided by the Company at each point of metered electricity delivery at such retail customer's premises.
- * Service under this rider does not extend beyond June 30, 2022, for any retail customer.

MONTHLY CHARGES.

- * The monthly charges presented in this Monthly Charges section are applicable to a retail customer for which the Company provides electric service that is measured by non AMI metering beginning with the fourth monthly billing period following the date on which the AMI Metering subsection of the Standard Metering section of the Metering part of the General Terms and Conditions of the Company's Schedule of Rates becomes applicable to the retail customer. Notwithstanding the previous provisions of this Monthly Charges section, for a retail customer to which such AMI Metering subsection is applicable as of February 13, 2014, the monthly charges presented in this Monthly Charges section are applicable to such retail customer for which the Company provides electric service that is measured by non AMI metering beginning with the fourth monthly billing period following the date on which the Company provides notification to such retail customer of the applicability of this rider to such retail customer.

(Continued from Sheet No. 446)

LATE PAYMENT CHARGE.

The Late Payment Charge as described in the Billing and Payment part of the General Terms and Conditions of the Company's Schedule of Rates is applicable to all charges applied in accordance with the provisions of this rider.

BIANNUAL REPORTING.

- * Each year, beginning in 2014, on or before April 1 and on or before October 1, the Company must submit to the Illinois Commerce Commission (ICC) a biannual report that summarizes the operation of this rider. Any such biannual report that is filed on or before April 1 in a year must be included, as applicable, in the Advanced Metering Annual Implementation Progress Report ("AIPR") filed by the Company pursuant to Section 16-108.6(e) of the Public Utilities Act (Act) that requires the Company to file a report by April 1 of each year "regarding the progress it has made toward completing implementation of its [Advanced Metering Infrastructure] AMI Plan."

Such biannual report must provide (a) the number of retail customers to which this rider is applicable; (b) a description of the Company's efforts to address such retail customers; and (c) identification of the Company's costs that are associated with providing service under this rider.

MISCELLANEOUS GENERAL PROVISIONS.

Data pertaining to retail customers for which service is provided hereunder are not considered in the determination of the Estimated Electric Bills Penalty (PEN5), as described in Rider DSPM – Delivery Service Performance Metrics (Rider DSPM).

- * The Company must file a petition with the ICC no later than June 30, 2020, seeking a reevaluation of this rider and requesting that the ICC open a docketed proceeding in order for the ICC to investigate and determine permanent terms and conditions under which service is to be rendered after June 30, 2022, to retail customers that refuse to voluntarily accept the installation of AMI metering or to voluntarily permit the operation of AMI metering at their premises. The results of a study of the operation of this rider since its inception must accompany such filing.
- * Nothing in this rider limits a retail customer's obligations, without limitation, with respect to the Company's access to such retail customer's premises and with respect to the Company's rights to access, install, maintain, inspect, and read its electric service meters and associated metering facilities.

The Company's Schedule of Rates, of which this rider is a part, includes General Terms and Conditions and other tariffs. Except as explicitly specified in this rider, electric service is subject to the General Terms and Conditions and such other tariffs, as applicable.
